Vision

To become leader in changing the way outcomes are delivered

Mission

“Dhii is dedicated to provide and deliver cost effective IT solutions and help enhancing the productivity and Competiveness of its clients / customers by connecting intellects and sharing knowledge and resources”. Together with our customers, Dhii is changing the way outcomes are delivered.

**Intelligent People
Innovative solutions**

As the saying goes “Change is eternal.” Nature, Industry, Technology and needs keep changing constantly. At Dhii, we keep pace with change and generate solutions concurrent with the needs of technology and industry.

A responsive solution provider knows that customer needs, drive solutions. We believe in developing a better understanding of our customer and their needs. Treating customers as partners, we arrive at solutions that are customer-friendly and add value to the current and future direction of our client’s IT investment.

The most profitable customer relationships are those that are long-term and expand over time. All our efforts are focused towards creating long-term relationships with our customers.

Dhii has got a sustainable business model, which ensures that customer needs are completed on time. A long term post implementation support is provided.

With the advent of Internet and e-commerce in our lives, it has become essential for every organization to be up-to-date with the latest in technology. Keeping pace with technology and delivering efficient solutions and quality support, we are ‘Intelligent People with Innovative Solutions.’

Achieving excellence has always been our endeavour – through knowledge, through technology. At Dhii, our endeavor is to adhere to the highest international quality standards as the company is committed to excellence in every area of operation.

A products and services company with global reach, Dhii was established in the year 2009. The company’s goal is to provide the best service and top quality technological solutions to customers.

To help clients achieve their expansive information technology goals, Dhii offers a full range of services across many technology platforms. Dhii provides services to global customers with consistency, quality, innovation, and commitment.

Human capital is our most important asset. We have a repository of highly trained software developers and domain experts. Coupled with this, our state-of-the-art infrastructure and technology helps us meet the needs of our customers.

Professional Consulting

Dhii has built its expertise in providing consulting services in IT Roadmap Planning and NABH/NABL Accreditation support for organizations who are on growth path. Our forte lies in managing and providing the specialist consulting expertise in the life cycle of projects – be it people plan, technical delivery plan, infrastructure plan or an end-to-end build in business – designing the systems and administering the facility for a structured growth in the Health Care Domain.

Professional Services

Core competencies of business transformation, business re-engineering and system integration enable us to help implement complex solutions. Responsibility and risk associated with complex project management, multi-party software and multi-vendor hardware, with customized solution, design and implementation are handled by Dhii as a System Integrator.

Dhii Professionals with multi-disciplinary approach for project management deliver our innovative solutions for a full service implementation-from concept to finish.

Considering the fact that internet overwhelms the market, integration of diverse platforms, operating systems and technology of prime importance which Dhii will address as the needs demand. With an integrated yet optional approach to customer convenience we have business practice in a five pronged manner for focused business delivery.

Managed IT Services

Dhii as a managed IT services provider (MSP), manages and assumes responsibility for providing a defined set of services to their clients either proactively or as they (not the client) determine that the services are needed. Dhii's business model is bill an upfront setup or Transition and an on-going flat or near-fixed monthly fee, which benefits the clients by providing them with predictable IT support costs.
